

Safety Plan and Procedures

With the recent focus on school safety, the staff at Shoshone School District has spent time reviewing our current safety plan and procedures. With a few minor changes we feel confident that our plan provides a high degree of safety and security for both students and staff.

As a parent of a Shoshone student(s), you can help us by following school procedures for dropping off, picking up, and visiting/volunteering during school hours. Please take a few minutes and review the following procedures:

1. Please remember that the front entrance of the school is the **ONLY** entrance that parent/visitors should use. All doors are locked during school hours.
2. All visitors **MUST** check in through the doorbell/speaker system located at the front of the school inside the breezeway.
3. During arrival and departure times, parents who wish to wait for their child/children **MUST** remain outside the main front doors. If there is an immediate need for you to speak with a staff member, you may request to enter the school by ringing the appropriate doorbell for M.S./H.S. or elementary office.
4. Unauthorized adults are not permitted on the playground during school hours. This includes when students first arrive at school. Only parents/visitors that have a clearance pass obtained through the M.S./H.S. or elementary office are allowed to be on the playground.

All Shoshone staff are responsible for monitoring these procedures and will re-direct parents/visitors to the office when necessary. Please understand that student safety remains a top priority for our school. We will continue our efforts toward making Shoshone School District both a safe place for children to learn, as well as a welcome place for families to visit and be involved with their child's/children's education.
